

**Folds, faults and bedding orientation  
in the coal-bearing Mist Mountain Formation of the Kootenay Group (late Jurassic and early Cretaceous)  
exposed at the intersection of Three Sisters Drive and Spray Lakes Road in Canmore, Alberta**

*Geology and photographic montage by Ben Gadd, 2014*

----- Dashed lines follow bedding  
Solid lines represent faults  
Arrows indicate relative motion where known  
Up Bedding orientation
